

The Zones of Regulation

RATIONALE

Self-regulation is something everyone continually works on, whether we are aware of it or not. We all encounter trying circumstances that test our limits from time to time. If we are able to recognise when we are becoming less regulated, we are able to do something about it to feel better and get ourselves to a better place. This comes naturally for some, but for others it is a skill that needs to be taught and practiced. This is the goal of The Zones of Regulation (or Zones for short). By addressing underlying deficits in emotional and sensory regulation, executive functions, and social cognition, the curriculum is designed to help move pupils toward independent regulation. The Zones of Regulation incorporates Social Thinking® concepts and numerous visuals to teach pupils to identify their feelings/level of alertness, understand how their behaviour impacts those around them, and learn what tools they can use to manage their feelings and states. At Castleward Spencer Academy, we have implemented the Zones of Regulation across the school as a strategy to assist our pupils in developing skills to maintain and improve their mental and social well-being. Teachers, Governors and children alike, adopt the principles of Zones on a daily basis and we incorporate these into lessons and daily life. Zones forms part of the culture of our school. Zones of Regulation supports our behaviour policy.

WHAT ARE THE ZONES OF REGULATION?

The Zones is a systematic, cognitive behaviour approach used to teach self-regulation by categorizing all the different ways we feel and states of alertness we experience into four concrete zones. The Zones curriculum provides strategies to teach pupils to become more aware of, and independent in controlling their emotions and impulses, managing their sensory needs, and improving their ability to problem solve conflicts.

The Four Zones: Our Feelings & States Determine Our Zone

The **Red Zone** is used to describe extremely heightened states of alertness and intense emotions. A person may be elated or experiencing anger, rage, explosive behaviour, devastation, or terror when in the Red Zone.

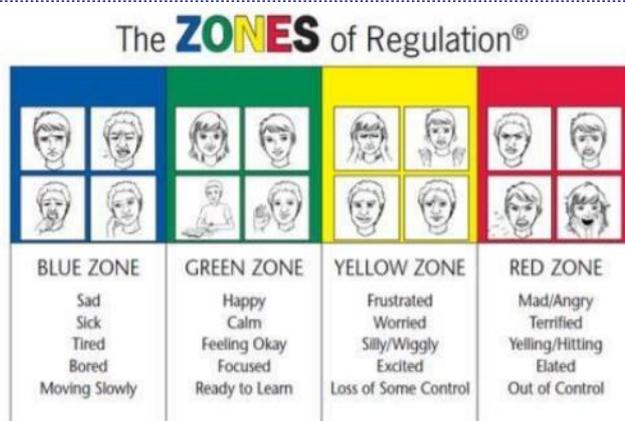

The **Yellow Zone** is also used to describe a heightened state of alertness and elevated emotions; however, one has some control when they are in the Yellow Zone. A person may be experiencing stress, frustration, anxiety, excitement, silliness, the wiggles, or nervousness when in the Yellow Zone.

The **Green Zone** is used to describe a calm state of alertness. A person may be described as happy, focused, content, or ready to learn when in the Green Zone. This is the zone where optimal learning occurs.

The **Blue Zone** is used to describe low states of alertness and down feelings, such as when one feels sad, tired, sick, or bored.

The Zones can be compared to traffic signs. When given a green light or in the Green Zone, one is “good to go”. A yellow sign means be aware or take caution, which applies to the Yellow Zone. A red light or stop sign means stop, and when one is the Red Zone, this often is the case. The Blue Zone can be compared to the rest area signs where one goes to rest or re-energize. All of the zones are expected at one time or another, but the curriculum focuses on teaching pupils how to manage their Zone based on the environment and people around them.

It is ok to have red zone feelings, but the correct ‘expected’ strategies need to be chosen (eg ask for help, take a breath, time out) not the red unexpected behaviours (eg hitting, screaming, swearing)

SYSTEM FOR IMPLEMENTING THE ZONES OF REGULATION

- Starts with teaching the difference between feelings and behaviours in all zones
- Teaching expected and unexpected behaviours in all zones
- Develop tool box strategies for all zones

- Implement self-monitoring tools, tracking tools for teachers, and a system for monitoring progress towards the development of self-regulation skills

STRATEGIES

At Castleward Spencer Academy, teachers are expected to teach a series of lessons to pupils on the Zones of Regulation. There are many strategies we can teach our pupils to help them self-regulate. The following are a few examples from the program. Pupils should be able to select up from 3-5 strategies from their toolbox they can use to regulate their emotions.

- Size of the problem
- Breathing strategies (lazy 8 & 6 sided breathing)
- Chill out area in the classroom
- Checking In- bookmarks/coloured zones
- Have a break
- Jump, bounce
- Take a walk
- Squeeze object
- Count to 5 or 10
- Social stories
- Listen to music
- Change activity

RESOURCES

The Zones of Regulation has a resource book and we have a copy in school. All resources have also been placed on the shared drive in the folder 'Zones of Regulation'. Posters are to be displayed within each classroom and teachers must implement a method that pupils can use to communicate the zone they are in at any given time. Eg bookmark, class poster, charts and coloured coins.

COMMON LANGUAGE

At Castleward Spencer Academy, we will use common language of the Zones, in identifying our feelings and pupils will be able to select from learnt strategies to assist them if needing to transition to a different zone. This will be particularly true for pupils in the red zone.

EHCPs and Individual Education Plans

The Zones of Regulation can be used to set targets for pupils with self-regulation issues when writing EHCPs.

Sample ECHP and IEP Objectives

1. Child x will improve his/her ability to self-monitor his own behaviour
2. • Objective/Target: x will identify his/her current emotional state on a levelled chart indicating differing levels of emotional arousal • Objective: Utilizing a levelled chart system, x will identify

his current level of behavioural escalation 2. When experiencing emotional or behavioural arousal, x will select a strategy to help himself return to a calm state • Objective/Target: When experiencing emotional arousal (e.g. feeling sad, mad, etc.) x will utilise a toolbox chart to identify a strategy to respond without behavioural escalation • Objective: When experiencing behavioural escalation, x will utilise a tool-box chart to identify a strategy to de-escalate his/her behaviour, with adult facilitation Please see Wimbish Primary School Behaviour policy document.
